

**vYSoo, international specialist  
in the development and the manufacture of solutions WiFi enriches  
its range and announces the launching of  
its range of mobile routers WiFi**

*Offering new prospects for communication for the consumers, these routers are the first mobile models, which give access a connection Internet and of to share this access or you want and when you wish it*

**vYSoo** international specialist in Wifi announces the launching of its first mobile router Wifi.

**Simple to configure, elegant thanks to his purified, light design (275 grams) and easy to transport, the Mobile Router WiFi of vYSoo brings to you an access to Internet in situation of mobility.**

**A Mobile Router who combines facilitated configuration, ease of use and technological power.**

**Being based on its will to make WiFi accessible to each one among us, vYSoo proposes a router usable without any preliminary technical training.**

It is indeed enough to insert the season ticket (GPRS/EDGE/CDMA/EVDO/3G/UMTS/HSDPA/HSUPA/3G+/WIMAX/) in the site envisaged for this purpose on the router (you have according to the models a port USB, of a slot for chart SIM Data or from a port PCMCIA) to immediately have an access to Internet and to share this WiFi connection around you.

Of a range going up to 70 meters in Interior and with 250 meters in Outside, this Mobile router functions without any software to install. Used without Data subscription, the router, connected to a line ADSL transforms itself into Access point Wifi.

It integrates the parameters of safety (WEP, WPA and Firewall included) which enable you to work under best the possible conditions and profits from many accessories supporting its use in situation of mobility (kit conveys with attachment unit interior, battery, cord food, cover of transport).

### **An new approach of the Mobile Internet**

vYSoo innovates once again by developing its Party taken Utilisateur and makes it possible to the consumers to invent novel modes of consumption of the Mobile Internet which positions in total synergy with the Unlimited Data offers suggested recently by the operators increasingly unlimited and less and less expensive.

The consumers will be able to reach the freedom of a connection which does not depend any more of Hots Spots and their deployment, a connection without having to fear the prohibitory costs with the hotel or the airport, a fast connection or one does not have to await any more the unchoking of Hot Spot attacked whereas its train leaves in 5 minutes.

That it is on holiday, within the framework of their work or their personal life, the user's needs do not cease growing to have a permanent access to Internet. This mobile router WiFi is a relevant answer to their waitings and it positions in the tendency suggested by the telephone operators. Indeed, the fixed price dated unlimited which quickly will be essential in France as that is already the case in many countries of Europe, will allow to bring daily answers to these waitings by offering a connection shareable WiFi in situation of mobility (car, country cottage with the mountain, warehouse, at the time of a professional living room on a stand, or in a hotel with a commercial team for whom it will be easy to create WorkSpot.

Some will be able to even use their professional fixed prices to be freed from an access ADSL to their residences and to realize

**The Internet Mobile it is still better when one can share it**

The occasions to make profit your relations from your access to the Mobile Internet many and will be varied!

With your friends, your children, your collaborators, thanks to the router vYSoo you will share your access on many materials: IPHones, laptops, PDAs, Wifi Telephones, Printers...
